

# Port Moller Test Fish Catch Update

## Catch Update #15, June 24, 2025

[PMTF Catch Update Table](#)

[PMTF Raw Data](#)

Good evening,

All stations were fished today, and the weather continues to look good for the near future.

The Daily Catch Index decreased from yesterday, but this minor decline could easily reflect normal variability. At this point, we cannot confidently conclude that the migration rate past the test fishery is slowing. If the run is indeed very early, we would expect Port Moller catch indices to continue decreasing in the coming days.

**PMTF Stock Composition Status:** The 5th stock composition (June 23-24) should be released on tomorrow.

### Index by Station

S2: 0

S4: 159

S6: 156

S8: 57

S10: 74

S12: 4

S14: 5  
S16: 3  
S18: 3  
S20: 0  
S22: 0  
S24: 12

Daily Catch Index = 42

Jordan and Scott
