

Port Moller Test Fish Catch Update

Catch Update #6, June 15, 2026

[1—PMTF Catch Update Table](#)

[2—PMTF Raw Data](#)

Good evening,

The Daily Catch Index ticked up today, with the highest catches centered on Stations 10 and 12 and more fish scattered across the rest of the transect.

PMTF Stock Composition Status: The vessels will fish apart tomorrow, then meet again on Wednesday, June 17. Catches over the next two days should yield enough genetics samples for the season's first stock composition, covering June 16–17, and possibly today's catches as well, if the samples are needed. Results would then be released on June 18 or 19 with the caveat being that this expectation depends on good weather, sufficient samples, and a clean first genetics run.

Index by Station

S2: 0
S4: 0
S6: 2
S8: 0
S10: 60
S12: 78
S14: 2
S16: 10
S18: 12
S20: 0
S22: 0
S24: 0

Daily Catch Index = 14

Jordan and Scott
