

We would like to acknowledge the individuals and organizations who made the 2026 Western Alaska Chum Salmon Bycatch Assessment project a success. Thank you all.

Processors in Dutch Harbor/Akutan: We thank Kyle Robson and Jeff Claridad (Alyeska); Mohamed Mohamed (Northern Victor); Stephen Francis (Trident); Peggy McLaughlin (Unisea); and Dan Le (Westward). Processors granted access to chum salmon bycatch and coordinated inseason with the BBSRI team. Staff from each processor communicated daily with BBSRI port samplers regarding vessel offloads and transported fish totes to designated sampling areas.

Vessels: We thank the vessels and crew that assisted with transporting samples, supplies, and personnel between Akutan and Dutch Harbor, including the M/V *Eastern Wind*, and F/Vs *Arctic Explorer*, *Arctic Ram*, *Arcturus*, *Columbia*, *Dominator*, *Golden Dawn*, *Miss Leona*, *Northern Patriot*, *Royal Atlantic*, *Royal Viking*, and *Sovereignty*. We also thank Trident's Dutch Harbor ground transportation and logistics crew. A very special thank you goes out to the captain and crew of the F/V *Miss Leona* who helped with transportation of lab equipment and any special needs we had in Dutch Harbor for the project.

Saltwater, Inc.: Port samplers were Joshua Deanfipps, Matthew Dingess, Elijah Otto-Cutting, and Peter Ries (Dutch Harbor); Ricardo Hernandez, Julie Kellicutt, and Alan Salamonovitz (Akutan).

Makushin Bay Resources Inc.: Jeff Brammer (owner) rented BBSRI laboratory space and storage in Dutch Harbor; and Phong Tran assisted with laboratory logistics.

United Catcher Boats (UCB): Susie Zagorski provided valuable project input and helped liaise with industry representatives.

National Oceanographic and Atmospheric Administration (NOAA): Patrick Barry, Emi Boyd-Tucker, and Arabella Terpin-Lewis ran the stock composition estimates and produced weekly inseason reports; Phil Ganz provided weekly inseason AKFIN offload data; and Wes Larson provided genetics-related project insights.

Alaska Department of Fish and Game (ADF&G): Office of the Commissioner; Gene Conservation Laboratory; and Mark, Tag and Age Laboratory.

Bristol Bay Science and Research Institute (BBSRI): Jordan Head was the principal investigator; Jason Smith was the project manager, Abby Duffy was the Dutch Harbor lab manager; Matthew Phillips was an assistant genotyper in Dutch Harbor; Tami Matheny assisted with procurement, logistics, and administration; and Sam Harris provided logistical support.

Funding: Funding for the project this year was provided by the following Community Development Quota (CDQ) Organizations: Aleutian Pribilof Island Community Development Association (APICDA), Bristol Bay Economic Development Corporation (BBEDC), Central Bering Sea Fishermen's Association (CBSFA), Coastal Villages Region Fund (CVRF), Norton Sound Economic Development Corporation (NSEDG), and Yukon Delta Fisheries Development Association (YDFDA). Additionally, funding was also provided by the Bristol Bay Science and Research Institute (BBSRI).
