

Port Moller Test Fish Catch Update

Catch Update #19, June 28, 2026

1—PMTF Catch Update Table

2—PMTF Raw Data

3—C+E by District and Day for 2011-2026

Good evening,

Ups and downs happen at the test fishery, as you may have noticed. Down today. The weather was a bit rough though and less conducive to fishing than any day so far this season. Today's lower index may say more about conditions than about the run. We'll need to see several more days of lighter catches before concluding the migration rate is waning at the test fishery.

PMTF Stock Composition Status: The stock composition for June 28–29 should be released 6/30 or 7/1.
