

Port Moller Test Fish Catch Update

Catch Update #19, June 28, 2025

1—PMTF Catch Update Table

2—PMTF Raw Data

3—District C+E over the Season for 2011-2025

4—PMTF Daily Index Partitioned by District

Good evening,

We observed another strong Daily Catch Index from the test fishery today with catches more evenly spread across the transect. If the Kvichak signal detected at Port Moller holds, we should see catch and escapement pick up over the next few days for this district.

The Station 26 catch index from yesterday was 23.

PMTF Stock Composition Status: The 7th stock composition (June 27-28) should be released tomorrow.
