

Port Moller Test Fish Catch Update

Catch Update #28, July 7, 2026

1—PMTF Catch Update Table

2—PMTF Raw Data

3—C+E by District and Day for 2011-2026

Good evening,

As is often the case late in the test fishing season, the Daily Catch Index rose today, up from the previous five days. Sustained strong catches at the transect over the next day or two could point to a later and larger run than anticipated. That said, in past years we've noticed that elevated catch indices late in the season don't always translate into C+E at the same level as comparable indices earlier on.

Our best estimates of travel times between the transect and the districts are as follows:

8.2 days-Ugashik,
8.7 days-Egegik,
7.3 days-Naknek/Kvichak,
8.6 days-Nushagak/Wood.

PMTF Stock Composition Status: The stock composition for July 6-7 should be released July 8-9.

Index by Station

S2: 60
S4: 105
S6: 188
S8: 225
S10: 49
S12: 3
S14: 8
S16: 4
S18: 2
S20: 0
S22: 2
S24: Not fished

Daily Catch Index = 54
