

Port Moller Test Fish Catch Update

Catch Update #1, June 10, 2026

Good evening everyone,

The 2026 Port Moller Test Fishery is officially underway, with the R/V Miss Leona sampling several stations today. The R/V St. Andrew arrives tonight, and with both vessels on the water, we expect full transect coverage beginning tomorrow. Results from today's catches will be included in tomorrow night's update.

PMTF Stock Composition Status: The first stock composition estimate will be released once a sufficient number of fish have been sampled to support a reliable analysis.

Jordan and Scott
