

Port Moller Test Fish Catch Update

Catch Update #18, June 27, 2025

1—PMTF Catch Update Table

2—PMTF Raw Data

3—District C+E over the Season for 2011-2025

4—PMTF Daily Index Partitioned by District

Good evening,

Today's 6th stock composition showed the four main districts continuing to build through June 25-26 (Link 4 above). The result for the Nushagak District was quite something, but we will not hazard to guess what it means for inshore catch and escapement just yet.

The Daily Catch Index for today remained as strong as yesterday, and there was a sizeable bump in the catch indices for the outermost stations (Link 1). The *R/V Miss Leona* will fish Station 26 this evening, but we will report that result in tomorrow's update.

The question now is how much over the preseason forecast will the run be?

PMTF Stock Composition Status: The 6th stock composition (June 25-26) was just released.

Index by Station

S2: 23

S4: 10

S6: 173

S8: 178

S10: 115

S12: 0

S14: 2

S16: 49

S18: 19

S20: 18

S22: 138

S24: 245

Daily Catch Index = 66
