

Port Moller Test Fish Catch Update

Catch Update #23, July 2, 2025

1—PMTF Catch Update Table

2—PMTF Raw Data

3—District C+E over the Season for 2011-2025

4—PMTF Daily Index and C+E by District

Good evening,

Fishing conditions improved somewhat today, and the Daily Catch Index rose compared to yesterday. The forecast calls for favorable weather again tomorrow. While the migration rate past the test fishery appears to be tapering off, the decline does not seem abrupt.

At this point, our best estimate is that catch and escapement will remain strong through July 8, with a peak likely occurring on July 3 or 4.

PMTF Stock Composition Status: The 8th stock composition (June 29, 30, and July 1) will be released tomorrow.
