

Port Moller Test Fish Catch Update

Catch Update #10, June 19, 2025

[PMTF Catch Update Table](#)

[PMTF Raw Data](#)

Good evening,

Today, we had a very high index at Station 8, but the sudden decline in catches beyond Station 10 remains puzzling. Nevertheless, the overall Daily Catch Index edges upward.

Fishing operations tomorrow are likely to be delayed by weather, but the crews will cover as much ground as conditions allow.

PMTF Stock Composition Status: The two vessels will attempt to rendezvous and transfer samples tomorrow evening if weather permits.
